

Shaping Our future

Local Area Agreement

2008 – 2011

stockton
renaissance

The Social & Economic Regeneration of Stockton-on-Tees, Billingham, Thornaby and Yarm

This Local Area Agreement forms a performance contract between the Council and its partners through Stockton Renaissance, and the Government. It is the delivery plan for the first three years of our Sustainable Community Strategy, "Shaping Our Future".

The agreement has been developed following consultation with local people and a wide range of stakeholders through Stockton Renaissance, and an intensive negotiation process with Government Office for the North East on behalf of central government.

Progress against the targets included in the agreement will be reported to Stockton Renaissance twice a year and to the Government annually.

Shaping Our future: Executive Summary of the Sustainable Community Strategy for the borough of Stockton-on-Tees

Introduction

Stockton Renaissance is our Local Strategic Partnership. It brings together key public, private and voluntary agencies and the Community Empowerment Network, which supports and co-ordinates all of the voluntary and community groups in the Borough.

We have a duty to prepare a Sustainable Community Strategy which outlines how we will work together to improve the economic, social and environmental well-being of our area. During the summer of 2007 Stockton Renaissance listened to residents, communities and key partners in our borough and agreed the key themes for this new, longer term Sustainable Community Strategy.

Our Vision

Stockton-on-Tees is a diverse borough with a thriving population of more than 189,000 people within easy reach of city shopping and leisure facilities, the coast and rural North Yorkshire. A mixture of urban centres, market towns and villages and with an expanding University, Stockton-on-Tees is a place with an exciting future.

We are committed both to economic regeneration through redeveloping our town centres, improving our transport and increasing the number and quality of jobs available in our borough and to improving quality of life by regenerating local communities and providing opportunities and services for individuals. This will help us to achieve our long term and continued vision of

“promoting achievement: tackling disadvantage.”

Our vision stretches beyond our boundaries and with the other Tees Valley Authorities we submitted a “city region” business case to the Secretary of State in 2006. It was well received and led to the creation of “Tees Valley Unlimited”, a partnership coordinating economic improvement activity across the Tees Valley. Strong governance arrangements have been developed with a non local authority chair and an overall membership of organisations and people that can add real value to TVU’s objective of improving economic performance in the Tees Valley.

The place related programmes included in the investment plan are being incorporated into a Multi Area Agreement for the Tees Valley. Work on developing the MAA is at an advanced stage and we anticipate that it will be one of the first in the country to be agreed in July 2008. The sign off of the MAA by government will provide both government and TVU with additional comfort that a well thought out plan is in place to improve the economic prosperity of the city region and will help us successfully deliver the ambitious targets in our LAA.

Stockton-on-Tees:

The facts

Our People

Stockton-on-Tees has a population of 189,100 people who live in 81,086 households, which has risen by almost 7% since 1991 with the rest of the North East seeing a fall of 2%. People of working age account for 63% of the population, children (those under 16) 20% and retired people 18%. Like the rest of the country, our population is ageing with there being increasing numbers of older people and fewer children. At the time of the 2001 Census almost 3% of our population were

from Black and Minority Ethnic backgrounds, a figure which is increasing. 66% of our residents feel that their area is a place where people of different backgrounds get on well together. Whilst 20% of residents have a long term illness which limits their day-to-day activities, people in the borough continue to get healthier but deaths from heart disease and cancer are still above the national average.

In March 2008 there were 3,726 people claiming Job Seekers Allowance in Stockton on Tees, giving an unemployment rate of 3.1%, lower than the north east average but higher than the national figure. Our schools continue to improve and over recent years we have seen GCSE results improve at a faster rate than nationally, removing the gap between local and national outcomes. 25% of residents have a degree or professional qualification, a rate which is only slightly below the national level. Both employment rates and educational achievement vary across the borough.

Residents are happy with the borough as a place to live, 84% being positive in 2006, but this figure varies across the borough and we will work towards all residents being proud of where they live and Stockton-on-Tees as a whole.

Our Place

The quality of our environment has improved. From being named one of the dirtiest places in England in 2001, we were named one of the cleanest boroughs in 2006, winning the prestigious Britain in Bloom competition a year later. We have the highest rate of

two-car ownership in the North East at 22% and continue to improve our road network such as the South Stockton link. However, we are committed to improving our public transport to ensure we do not become reliant on the private car. We have also regenerated large amounts of our housing stock with regeneration activities are well under way in Mandale, Hardwick, Parkfield and Mill Lane.

Crime rates continue to fall within the borough, which now has the lowest crime rate in the Tees Valley and significantly fewer people now feel unsafe when outside during the day. However, tackling crime and anti-social behaviour, as well as people's fear of crime remains a key priority.

The River Tees continues to be a key focal point for the borough, now providing an exciting choice of recreation and sporting activities, including sailing, kayaking and fishing.

We have world leading cultural activities such as Stockton International Riverside Festival and Billingham International Folklore Festival as well as ARC, Billingham Forum, Preston Hall Museum and our excellent parks and countryside facilities.

Our Ambitions

The Sustainable Community Strategy has been developed along five key and three supporting themes. Whilst these are described individually there are key links between them all and only by working in partnership across Renaissance and its thematic partnerships will we successfully achieve our ambitions.

Economic Regeneration and Transport

Our ambition is for a Stockton-on-Tees which is at the heart of an economically successful Tees Valley, which offers high employment levels and improved facilities for shopping, recreation and leisure. One of our key targets is to ensure we have vibrant and successful town centres in each of our communities, concentrating on Stockton, Billingham and Thornaby but also our smaller town centres and markets across the borough. We will have a strong local economy with better jobs and improved employability through further developing our existing employment base as well as attracting new employers to the borough making sure our residents have the necessary skills and qualifications to secure the new jobs created. Improved city-scale facilities across the Tees Valley will be developed to ensure that we have shopping, leisure and residential facilities in the area to rival any city. We will enhance the use of the River Tees as a leisure facility through iconic projects such as the new footbridge and ambitious Green Blue heart initiative to develop excellent green space between Stockton and Middlesbrough with the Tees at its heart. Finally, we will develop improved transport networks by further developing our road network but also our public transport provision to ensure that Stockton-on-Tees remains an area with low congestion and not one which is reliant only on the private car.

Environment and Housing

We have a vision for a cleaner, greener borough which leads the UK in waste minimisation, has excellent parks and green spaces and the highest quality housing provision. We will have neighbourhoods in which our residents feel pride and have a real sense of belonging and ownership. We will improve waste management by continuing to develop our approach to waste minimisation and recycling and create better open spaces by further developing both our large flagship parks as well as our smaller neighbourhood green spaces and urban grey spaces, such as town and neighbourhood centres. We will tackle climate change by preparing for potential changes in the services we deliver and how we deliver them as well as trying to reduce our own carbon footprint.

We will continue to improve our housing carrying on our regeneration activities to offer people the homes they want to live in through regeneration, redevelopment and having sites ready for new developments where needed. We will deliver design quality in our new developments, processing planning applications as efficiently as possible but ensuring that new buildings meet the need and aspirations of our communities.

Safer Communities

Our vision is for a safe borough where all residents are able to live their lives in a borough free from crime and fear of crime. We will reduce crime and fear of crime building on the success we have already had, which makes Stockton-on-Tees the borough with the lowest crime rate in the Tees Valley, concentrating on further reducing the violent crime and arson rates. We will reduce anti-social behaviour and residents concerns about it. Also we will reduce the impact of alcohol and

drugs misuse tackling the supply and use of illegal drugs, and increase the numbers of drug users receiving treatment.

Children and Young People

Our vision across the whole borough is 'Every Child Matters: No Child Left Behind'. We want all children and young people to have stable, safe environments and access to opportunities to achieve their full potential. We will help our children and young people to be healthy by tackling childhood obesity, teenage conception rates, levels of substance misuse and emotional and mental health difficulties.

We will give increasing attention to early intervention and preventative approaches for families in need, through delivery of integrated and locally accessible services. Safeguarding our children is a key priority, especially those who are vulnerable, including children who are in the care of the local authority. Placement stability and access to education, employment or training for those in care or care leavers are particularly important. Helping all our young people, including those who experience disadvantage, to enjoy and achieve is a key priority, by providing a wide range of educational, cultural and recreational opportunities. We are committed to enabling our young people to make a positive contribution by continued development of positive activities and facilities, and ensuring young people are properly engaged in the planning and development of services.

Finally we will help young people and their families to improve their economic well-being, by alleviating poverty and working to ensure that even more young people benefit from participation in further education, employment and training.

Health and wellbeing

Our vision is for a healthier borough where all residents are able to take control of their own physical and mental health and wellbeing, though living healthy and active lifestyles and having easy access to high quality health services when ill-health does occur. We will reduce health inequalities both between Stockton on Tees and the rest of the UK, for example through the promotion of breast feeding, but also between the most and least well off areas of our borough. We will support and increase the independence of vulnerable people, helping older people remain in their own homes longer by providing access to a range of independent living services and tackling social isolation. We will also seek to develop our support for carers, recognising the important role they play. Further developing increased choice and voice for service users will continue to be a high priority for ensuring people have a choice in the care they receive and how it is delivered, building on initiatives such as direct payments and individual budgets. The future development of health and wellbeing provision will focus on both prevention and cure, and will be driven by an increasing focus on personalisation of care, improved access to health facilities as well as promotion of healthy living.

Stronger Communities

Our vision is for a stronger and more cohesive society where there is a common sense of belonging for all communities and one where the diversity of people's backgrounds is appreciated and positively valued, where there is strong community involvement in public life and where there is a strong and vibrant community and voluntary sector.

We will seek to increase community pride, promote equality of opportunity and reduce tension and myth bust to help all our communities to continue living peacefully. Also we will ensure financial inclusion for all residents to ensure they are not denied any of the opportunities our increasingly vibrant borough is offering and tackling fuel poverty to ensure their homes are warm and comfortable.

Older Adults

Our vision is that the borough's older people grow older with dignity and maintain a high quality and independent lifestyle. This includes ensuring older adults are at the heart of community leadership and development exercising real choice, control and having easy access to facilities and services within a warm and welcoming community. We will also help older people look after and improve their personal wellbeing through the provision of high quality health and social care, lifelong learning, leisure and cultural activities.

Arts and Culture

Our vision is of culture supporting all aspects of life in our borough. We will continue to harness culture to raise local people's aspirations and well being, increase their pride in the area and in their own achievements, enabling residents to achieve their full potential. We will promote our festivals, the performing and visual arts, sport and leisure and raise the profile of our heritage.
